PERSONAL PROJECTS

Blood Bank (05/2021 - 06/2021)
- The new generation's blood bank, powered by the Ethereum blockchain build with solidity. Blood bottles can be tracked from their origin to the end-user with blockchains power and its security keeping all data safe and immutable.

Document Sharing (05/2020 - 06/2020)
- A blockchain-based framework for document sharing, preserving, and verification using Ethereum. The document can be shared from one organization and another, they will have the option to verify the authenticity of the document.

Love Alarm (10/2019 - 11/2019)
- Designed and developed an Android app, that rings when someone likes you came, near a 10-meter radius of you. If there is more than one person present in that area, then you can't say who is ringing your love alarm.

ACHIEVEMENTS

Copyright
Has copyright in a blockchain-based framework for document sharing, preserving, and verification using ethereum.

Leadership
Managed a team of 4 employees, ensuring that a $3000-budgeted project was completed successfully by the expected deadline.

First Class First
Have been a consistent topper in academics, and class representative maintaining a friendly and respectful relationship with every teacher and student.
